

International Conference on Vulnerability and Risk Analysis and Management (ICVRAM) and International Symposium on Uncertainty Modeling and Analysis (ISUMA)

CALL FOR PROPOSALS to host the next ICVRAM-ISUMA in 2016 or 2017

ICVRAM-ISUMA provides a multi-disciplinary forum for the exchange of knowledge and expertise, in the Quantification, Mitigation and Management of Risk and Uncertainty, and in Decision Making with a strong track record in sustainable offerings and attendance since 1990. The event is aimed at specialised and synergetic developments in both theory and practice. The objective of this conference is to bring experts and decision makers from different disciplines but working on similar problems together to share information on current and emerging developments and to initiate advancements towards a solution to our challenges through cross-fertilization. This conference and subsequent publications will help transition intellectual discussions into robust frameworks for handling emerging vulnerabilities and risks, and provide the leadership and initiative required to respond to national and international disasters.
